

TWEED RIVER ENTRANCE AS AT 22 JUNE 2016

WARNINGS: Extreme caution should be used when navigating this entrance.

Changes in bed and channel contours could occur rapidly due to waves and currents.

Entrance users should not rely on this information, as conditions may have changed since the date of this survey.

Seabed contours show average depths in metres below Tweed River Hydro Datum (approx ISLW), not clearance depths.

NOTES:

1. Survey information collected by Michel Group Services 22 June 2016.
2. Survey drawing prepared by Hydrosphere Consulting 8 July 2016.
3. Surveys are undertaken for Tweed Sand Bypassing every three months to monitor entrance seabed levels.

TWEED RIVER ENTRANCE SAND BYPASSING PROJECT

Tweed River Entrance Sand Bypassing is a joint project of the New South Wales and Queensland Governments, with the support of the Gold Coast City Council, and in conjunction with Tweed Shire Council.
