

TWEED RIVER ENTRANCE AS AT 19 MAY 2016

WARNINGS: *Extreme caution should be used when navigating this entrance.*

Changes in bed and channel contours could occur rapidly due to waves and currents.

Entrance users should not rely on this information, as conditions may have changed since the date of this survey.

Seabed contours show average depths in metres below Tweed River Hydro Datum (approx ISLW), not clearance depths.

NOTES:

1. Survey information collected by Michel Group Services on 19 and 23 May 2016 for the Tweed River Entrance Sand Bypassing Project.
2. Surveys are undertaken every three months to monitor entrance seabed levels.

TWEED RIVER ENTRANCE SAND BYPASSING PROJECT

The Tweed River Entrance Sand Bypassing Project is a joint project of the New South Wales and Queensland Governments, with the support of the City of Gold Coast and in conjunction with the Tweed Shire Council.
